

Storage

We specialize in containerised storage. Your goods are carefully loaded into our wooden storage containers at your address using our specialist side loading vehicles. As all furniture is loaded into the containers it is soft blanket wrapped and packed with great care and attention. Once full each container is fitted with a security seal that is broken on the return of your goods. On arrival at the warehouse containers are lifted off the vehicle and stowed away. Storage can be for as long or a short a period as you require - be it one week or for as long as you require.

We pride ourselves on our first class storage facilities and the protection used in each container to ensure your furniture returns to you in the same condition as when we collected it.

The warehouse is fully covered by a state of the art ADT security system.

For whatever reason you need to store your goods, i.e. travelling, property chain, home refurbishment, or simply just need more space, F & M Bennett & Son has the perfect storage solution.
