

European Services

F & M Bennett & Son will re-locate you to any part of mainland Europe. We regularly make trips to locations such as Ireland, Belgium, France, Spain and have even delivered as far north as Bergen in Norway.

Our modern fleet of Mercedes-Benz vehicles are equipped with air-ride suspension to carry your goods smoothly to your new destination. Our vehicles are also fitted with European satellite navigation systems to ensure maximum efficiency. Our vehicles all have double bunk sleeper cabs so the crew do not leave the vehicles unattended whilst we are on route to your new destination. The same crew who load the vehicle will remain with it until completion of your move. Our goods in transit insurance will cover your goods up to £100K.

We are members of the British Association of Removers and Fedemac. BAR code of practice carries full office of fair trade approval.

Our vehicles are fully equipped with soft blankets, ties, hanging garment rails, sofa covers, plasma TV covers, mattress covers etc. This protection is applied prior to your removal from your premises thus ensuring that your goods reach their destination in perfect condition.

On arrival at your new premises we will ensure that carpets, banisters and doorways are protected. Each vehicle also carries a full tool kit for any necessary dismantling and re-erecting.

We also offer a first class packing service, but if you wish to pack your own items, boxes and materials will be supplied prior to your move.

F & M Bennett & Son know that moving can be a stressful time, but we are committed to providing a high class service to make your move as stress free as possible.
